Projects

1. Weather-App

ReactJs hooks Api

A simple weather app using open weather api where you can search by city and get live results of weather condition and temps.

2. Employee-Management

ReactJs ExpressJs mysql

A basic employee management app where the HR of a company can add, show, update and delete an employee i.e. basically a crud application using mysql as database.

3. Registration-Form

ReactJs ExpressJs mysql

A very basic register and login form where the user info is stored on database after registration and is checked during login and display user if the user info is correct otherwise display wrong userinfo/password.

4.Portfolio-Website

HTML css(flexbox, media-queries, grids) Javascript

Made a responsive portfolio website using flex-box, css grids and media queries.

About Me

I am a beginner web developer, I am done with the basics of front-end and back-end development and currently looking for job opportunities and exploring various projects that I can make with the skills, languages and knowledge that I have gained during my graduation and self education.
